### Ontario's Most Wanted PowerPoint Assignment

Your power point should include:

1. An introductory slide
2. Describe the organism- scientific name, structure, method of reproduction, native land, method of dispersal (how did it get here)
3. Identify the habitat and part of Ontario the organism is affecting
4. Describes what the organism is doing to the area (e.g. impact on native species, habitat etc.)
5. Describes what currently is being done to stop the organism (i.e. municipal, provincial and/or federal legislation protecting further introduction of species).
6. Describes what could be done to stop the organism
7. Describes what could happen to the ecosystem if the organism isn't stopped

You will also be marked on:

- A. Neatness, organization
- B. Creativity and uniqueness
- C. Spelling and grammar (do not copy and paste)
- D. Bibliography. Use at least 3 sources and properly written in on a separate slide

Due Date: \_\_\_\_\_
